PROFESSIONAL SUMMARY

iOS Software Dev Engineer I skilled at creating polished, well designed, user-friendly applications.

TECHNICAL SKILLS

Proficient in CSS3, HTML5, JavaScript, React, Redux, Node.js, Postgres, Express.js, Sequelize, Git, Git-Hub, VS Code. Knowledgeable in Netlify, Heroku, OAuth, Jasmine, Postman, Gatsby.js, React-Native, Expo, Angular. Familiar in GraphQL, SQL, Next.js, Firebase, Pixi.js, PHP.

DEVELOPMENT PROJECTS

- **Pop’N Spots** (May 2019) (Capstone Project) [GitHub-Source Code](#) || www.popnspots.com
 - City guide where a user can see data visual representations on how busy a place is.
 - Designed and stylized entire website with CSS3 and Material UI.
 - Built many interactive UI components in React.
 - Sourced and scrapped our data from the Apify web aggregator platform.
 - Implemented Firebase to build backend database to store users and histogram of data occupancy.
 - Worked on a team of 4 developers. The application was developed in 2 weeks.
- **Edmazon** (April 2019) (E-Commerce Site) [GitHub-Source Code](#) || [Edmazon](#)
 - E-commerce site with full CRUD operations, users, and over a thousand products.
 - Designed database schema model, express routes, many interactive UI components in React, built product pages/reviews, and all of the styling in CSS3.
 - Implemented Nodemailer and Stripe Checkout API technologies.
 - Worked on a team of 4 developers, developed in under two weeks.
- **Tour** (March 2019) (React-Native/Hackathon) [GitHub-Source Code](#) || <https://expo.io/@jhelvey/Tour>
 - Developed a mobile Android application to find obscure travel spots around Chicago.
 - Implemented and taught myself Google Maps API, Atlas-Obscura API, React-Native-Navigation, Expo.
- **Portfolio** (June 2019) [GitHub-Source Code](#) || www.jonathanhelvey.com
 - A responsive static portfolio site built as a learning project for the JAM stack. Builds from Markdown files queried through Gatsby's GraphQL data layer.

ADDITIONAL EXPERIENCE

Freelance Web Developer

Full Stack Developer (August 2018 - present)

- Developed static site portfolios for actors in JavaScript, React, HTML5, and CSS3.
- Built and deployed websites using the JAM stack in WordPress, Gatsby.js, GraphQL and Netlify CMS.
- Designed the UI/UX, added SSL encryption, maintained domains and improved the SEO of portfolio sites.
